CAREER OBJECTIVE

Detail-oriented and passionate fresh graduate seeking a UI/UX Designer position. Eager to apply strong foundations in wireframing, prototyping, web and mobile app design, and usability principles. Adept at combining comprehensive design workflows with robust development skills to create intuitive digital solutions and contribute effectively to real-world projects.

SKILLS

- **Software:** Figma, Affinity
- **Design:** Wireframing, Prototyping, Interaction Design, Visual Design, UI/UX Design, Design Systems, Mobile Application Design, Web Design, Usability

EXPERIENCE

Freelance UI/UX Designer

Present

- Designed and prototyped user interfaces and user experiences for client and personal projects, delivering mobile and web solutions that balanced aesthetics and functionality.
- Created comprehensive wireframes, interactive prototypes, and visual interfaces using Figma to ensure high usability and visual consistency.
- Delivered user-centered design solutions that accurately met project requirements, enhanced user satisfaction, and ensured ease of use.

UI/UX Designer / Developer Intern

2026

City Health Office 1, Urdaneta City, Pangasinan

- Designed the UI/UX of a web-based Queuing Management System using Figma, translating office workflows into efficient wireframes, layouts, and prototypes.
- Developed functional web interfaces using PHP, HTML, CSS, JavaScript, and MySQL, successfully deploying approved UI designs into the live system.
- Improved the clarity and usability of the queuing interface by strategically organizing information and streamlining user interactions according to operational requirements.

UI/UX Designer / Programmer — Capstone Project

2025–2026

City Health Connect: A Multi-Platform Health Services Management System for the City Health Office of Urdaneta City

- Designed robust web and mobile system interfaces using Figma, creating wireframes and interactive prototypes that aligned with project requirements and user workflows.
- Developed full-stack web and mobile interfaces using PHP, HTML, CSS, JavaScript, Flutter, and MySQL to support comprehensive health-service processes.
- Enhanced system consistency and usability through structured user flows, clean layouts, and reusable interface patterns that optimized overall user experience.
